## Where in The World is Revco Bob?

### Inside

Follow The Clues to Identify Bob's Mystery Location  
and Win a Cool Piece of Sports Memorabilia

**Are You Still Ignoring Your Single Input Power Devices ?**

## We Can't Find Revco Bob!!

That's right. He didn't show up for this month's *FYI* cover photo shoot...and that's just not like him. After all, he has never before missed a cover photo; it's one of his favorite things to do each month. So, we started wondering what might have happened to him.

We knew that he had been complaining about a lingering cold, so we thought that maybe he was home in bed. Nope. He also injured his back a couple of weeks ago and thought he might be in too much pain to pose for photos. That wasn't it, either. Yet, he was nowhere to be found.

Just when we were about to stop looking, we received a rather strange message from Bob. The message didn't tell us where he was, but instead provided clues to his location. So, we thought it might be helpful if we put the clues he provided into this month's issue of *FYI* so you could help us track him down.

To make it even more fun and rewarding, Bob authorized us to offer a choice of two great "rewards" to each of the first 4 people who correctly figure out his location.

The first is a \$25 American Express Gift Cards that you can use for just about anything you want. However, the second prize is a really cool piece of sports memorabilia.

Bob wouldn't tell us what it is, because doing so would reveal his location. But, from what we've been told, if you are a big fan of this particular sport, or, if you know someone who is, you will truly appreciate this unique item from this iconic location. It's authentic, came directly from the mystery location, is worth \$40 and Bob has one reserved for you!

So, if you are ready, read the clues below and then enter your guess at:

<https://revco.infusionsoft.com/app/page/where-is-bob>

If you are amongst the first 4 people to correctly identify Bob's location, we'll contact you and give you your choice of either of these great prizes. Let's get started...

1. Originally built in 1895 as a "health retreat" by James Walker Tufts of Boston, early hotel guests here were often seen disturbing the dairy cows in the local fields while playing a newly introduced game. Today, this place is considered the world's pre-eminent resort for that very same little game.

2. For over 100 years, this place has been the home of “Putterboy”.
3. This June, Number 2 here will be the place where the best Men and Women players in the world will attempt to become #1.
4. Legends such as Bobby, Byron, Jack, Arnold, Sam, Ben and Payne have all walked these grounds.
5. A Tiger has been spotted here on several occasions.
6. This place is about an hour from one of Bob’s alma maters (that’s either UConn or NC State for those of you who haven’t yet read Bob’s bestselling autobiography).

## Monthly Quotes

*“To find a man's true character, play golf with him.” – P.G. Wodehouse*

*“I get to play golf for a living. What more can you ask for - getting paid for doing what you love.” – Tiger Woods*

*“Golf is deceptively simple and endlessly complicated.” – Arnold Palmer*

Once you think you know Bob’s location, enter your guess as soon as you can to improve your chance of winning. Good luck.

## And One More Clue...

Here is one more hint. Solve the following Word Search Puzzle. The unused letters spell the name of the location where Bob is hidin’ out.

# What Are You Doing to Provide Redundant A-B Power to Your Single Input Power Devices?

Nothing? That's OK. Just Keep Telling Yourself, "Everything Will Be Fine".

I first introduced you to our *Zonit Micro ATS* back in mid-2012. Since that time, it has become one of our most popular little products. This highly functional, in-rack transfer switch consumes no rack space and quickly and easily provides redundant power to single power input devices.

you're just waiting for trouble.

*"Come on, Bob, we only purchase devices with dual power."*

I'm sure you do, but just about everyone I've ever spoken to about this product was surprised when they actually counted the number of single input power devices they had in service.

In fact, many of the clients who have purchased the *Micro ATS* called me AFTER they experienced the loss of an important device. Human nature being what it is, they then decided they had to prevent that from happening again.

Since 2012, the Micro ATS line has expanded to include many more cord and input/output options. Standard input cord lengths include 2', 6' and 10', but virtually any length can be provided. On the output side, you can still get the integrated C-13 receptacle or your choice of receptacles on a 12" Y-cord. And, because of the demand, the ATS can be ordered with just about every outlet and receptacle style that is out there including NEMA 5-15, L5-20, L6-30, ICE C-13, C-14 and C-15.

Reasons why the Zonit Micro ATS is the best solution –

- Zero U – uses no rack space, install wherever needed
- A & B phases don't need to be aligned – Just plug it in!
- True one-to-one solution vs. multiple devices plugged into a single rack mounted ATS – eliminates a big point of failure
- Price – more cost effective than multi-outlet rack mount ATS

Don't wait any longer. Take a closer look at our Zonit Micro ATS today!
