Developing Good Homework and Study Habits

The following study and homework tips come from the American Academy of Pediatrics (AAP):

- Create an environment that is conducive to doing homework. Youngsters need a permanent work space in their bedroom or another part of the home that is quiet, without distractions, and promotes study.
- Schedule ample time for homework.
- Establish a household rule that the TV set stays off during homework time.
- Supervise computer and Internet use.
- Be available to answer questions and offer assistance, but never do a child's homework for her.
- Take steps to help alleviate eye fatigue, neck fatigue and brain fatigue while studying. It may be helpful to close the books for a few minutes, stretch, and take a break periodically when it will not be too disruptive.
- If your child is struggling with a particular subject, and you aren't able to help her yourself, a tutor can be a good solution. Talk it over with your child's teacher first.

Back to School Statistics

Nearly 50 million students are heading off to approximately 97,000 public elementary and secondary schools for the fall term. Before the school year is out, an estimated \$489 billion will be spent related to their education, with an average of \$9,969 to be spent per pupil for fall enrollment in public elementary and secondary schools. Some 3.2 million teachers were employed in public elementary and secondary schools in 2007-08. And more than 1.1 million students -- about two percent of all students -- will be homeschooled.

At the college level, a record 21.6 million students are expected to attend American colleges and universities, constituting an increase of about 6.2 million since fall 2000.

Real Science Test Answers

The following are answers from test papers and essays submitted to science and health teachers by junior high, high school, and college students...

- "Water is composed of two gins, Oxygen and Hydrogin. Oxygen is pure gin. Hydrogin is gin and water."
- "Three kinds of blood vessels are arteries, vanes and caterpillars."
- "The tides are a fight between the Earth and moon. All water tends towards the moon, because there is no water in the moon, and nature abhors a vacuum. I forget where the sun joins in this fight."
- "For drowning: Climb on top of the person and move up and down to make artificial perspiration."
- "The body consists of three parts- the brainium, the borax and the abominable cavity. The brainium contains the brain, the borax contains the heart and lungs, and the abominable cavity contains the bowls, of which there are five – a, e, i, o, and u."
- "A fossil is an extinct animal. The older it is, the more extinct it is."

Feeding Adolescents

Teenagers often arrive home from school craving food. Adolescence is a time of development and growth, so energy needs are extremely high, and after school those demands may be almost impossible to keep up with!

The good news is that some after-school snacks are healthy and nutritious as well as satisfying.

Good after-school snacks include milk shakes, breakfast cereal, baked beans on toast, sandwiches (with either fresh or toasted bread), rice or pasta, fruit, muffins, and yogurt.

It is also important to encourage adolescents to eat well early in the day. A lot of teenagers tend to miss breakfast and even have little to eat during the school day; they make up for this by raiding the fridge after school. Breakfast, lunch and even snacks should not be neglected during the day.

Introducing:

Revco's Ultimate Control Room Consoles

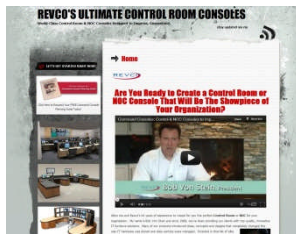

World-Class Control Room & NOC Consoles Designed to Impress. Guaranteed.

We just published our brand new web site and YouTube Channel dedicated specifically to the design, manufacture and installation of world-class control room and NOC consoles...and we want to know what you think.

While many of you may know Revco for our lines of server cabinets and racks, KVM and DCIM products, power solutions, IT environment monitoring and related products, we've also spent a lot of time over our 44 years designing and installing many NOC and control room environments. As that part of our business has grown, we've cemented a great relationship with the premier manufacturer in the industry, *Evans Consoles*.

Those of you that are familiar with *Evans Consoles* know that they have earned a reputation as the absolute best in the industry. In fact, I'm often still amazed at some of the creative, beautiful rooms their designers come up with, the quality of the finished products and the unique one-of-a-kind features that are often worked into our designs.

So whether you are interested in building a new NOC or control room environment, or are just curious, I invite you to visit our new web site

and YouTube Channel. You'll find informative videos and be able to request our **FREE *Command Console Planning Guide***. The guide is filled with useful information such as:

- a DVD with answers to our most commonly asked questions
- our project planner
- design road map
- product brochures
- a color guide
- details about the incredible Evans Lifetime Warranty and,
- full color, 3D renderings of other projects that will provide you with helpful examples and maybe even stimulate a few ideas.

When you get a moment, stop by our web site,

Control-Consoles.com

and our **YouTube Channel**,

Revco's Ultimate Control Room Consoles

and let us know what you think. Thanks.
